

AUCTIONS IN MOTION
SUCCESS ON THE WAY

Our Mission

We promote international exchange

GSM Go Auction is a leader in Europe in the distribution of used and refurbished smartphones.

Our goal is to make the largest number of used devices available to the international market by purchasing them from various sales channels worldwide.

We enable businesses in the market to acquire the best devices at the most competitive prices, ensuring speed, quality, and reliability.

We collaborate with major players in the international market and manage hundreds of thousands of products each year.

CONNECTING PEOPLE, CONNECTING BUSINESS MAKER

Empowering connections, inspiring business makers: it's not just about bringing people together but empowering them with a world of opportunities

BECOME A BIDDER, BECOME A LEADER

Are you coming to get started?
You can easily access the
world of online auctions without
requiring you to have specific
skills.
Follow in 4 steps how to become a
bidder.

Start Here

Becoming a bidder is simple. Just follow our brief guide.

Register

Visit our website www.gsmgoauction.com and navigate to the "My-Account" section. Click the orange button "Register Here" to initiate the account approval process.

Documents

Complete the registration form accurately, providing all required information, including billing and shipping addresses. Attach necessary documents (Certificate of incorporation, VAT Certificate, or others) to certify your company's eligibility to bid on our site. Access to this website is restricted to businesses or industry professionals only.

Approval

After completing the registration form, you will receive an email confirming that the approval process for your account has begun. Within 24 working hours, you will receive confirmation of your registration if it is approved.

Start Bids

Upon receiving the approval email for your account, you can start bidding on our auctions. Select the products of your interest and begin placing your bids. Whether you win or lose an auction, you will receive an email providing the details for that auction.

BID, SMILE, WIN: WHERE SIMPLICITY RULES THE AUCTION

Explore the streamlined functionality of our platform through our comprehensive user guide. Effortlessly navigate and engage in bids with ease, ensuring a professional and seamless experience at every turn.

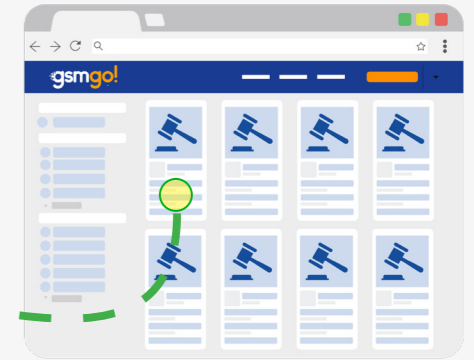

Login and select the auction

As a first step, enter our website and log in. At this point, you will be ready to choose which auction to participate in. Click directly on the auction or select from the various categories available on the site.

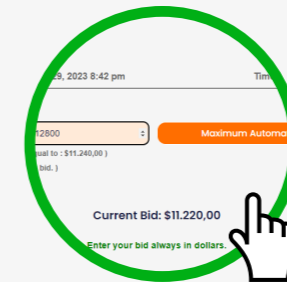

Select auction

On the auction page, you can choose which auction to participate in or filter those available based on the model, end time, or aesthetic grade. Select the auction you want to join by clicking on it.

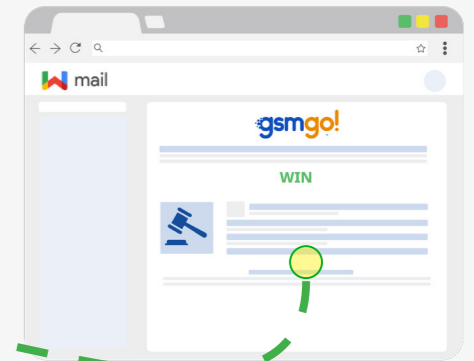

Place your maximum bid

Enter the maximum value you are willing to bid, then click on 'Maximum Automatic Bid.' Once you have entered your maximum bid, the system will use Proxy Bidding to place bids on your behalf. The system will automatically increase your bid in small increments only when necessary to maintain your leading position.

Monitor the Auction and Win

Set your maximum bid and let the system handle the rest. It will automatically increase your bid in response to others, keeping you in the lead. Receive email notifications, and if your maximum bid is the highest when the auction ends, you will be the winner and receive a confirmation email.

European Grading Guide

Our grading is based exclusively on aesthetic conditions. All our functional devices are tested and graded based on the presence or absence of scratches, scuffs, and any defects in the screen.

On our website, you will find devices ranging from grade A+ to grade E.

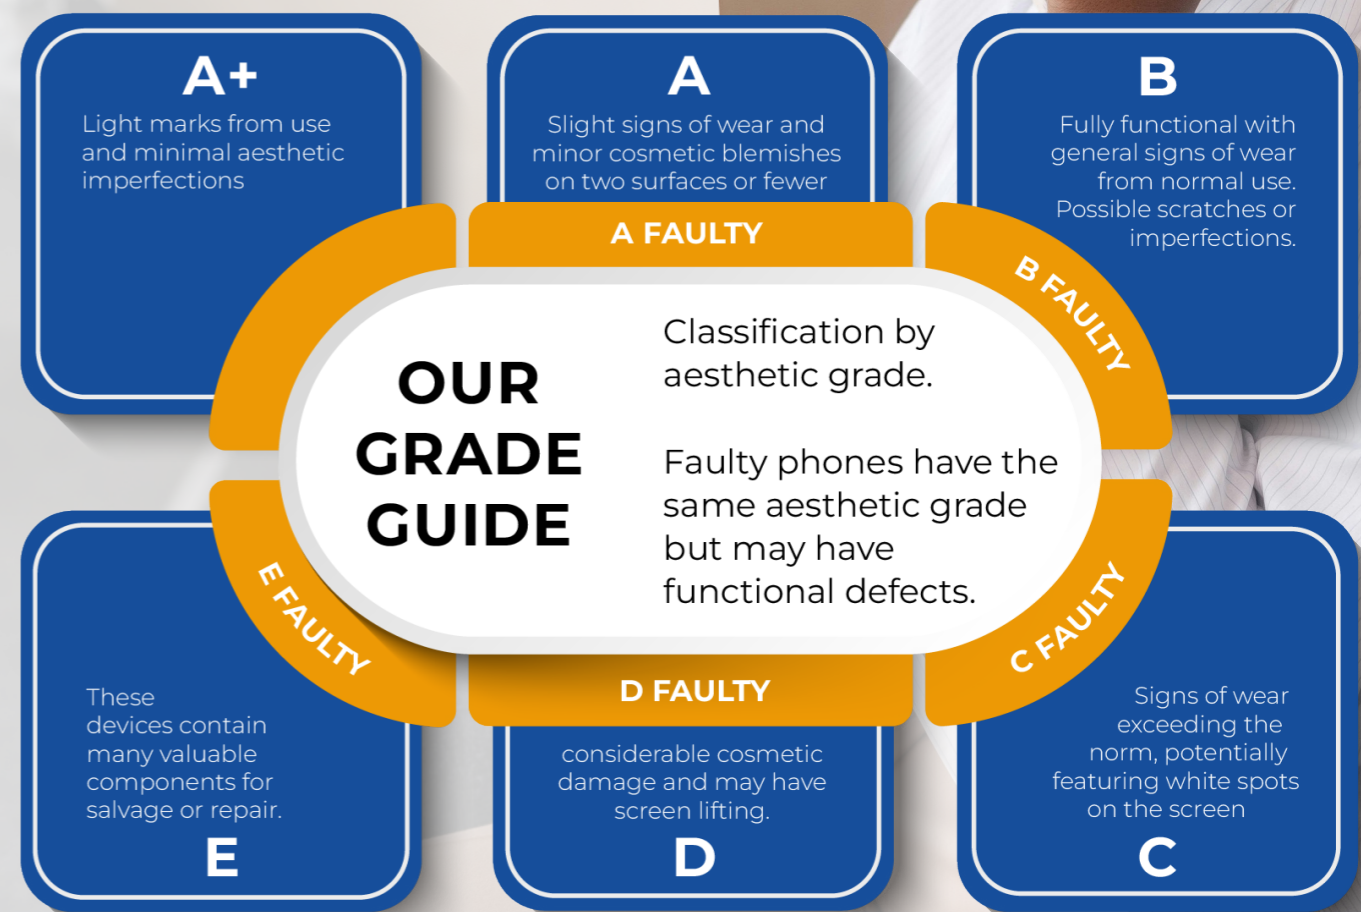

When devices are in the 'Faulty' section of our site, the classification remains the same, with the difference that they may be non-functional and have damage to various components.

In each auction, you will find a file with the complete list of devices for sale based on the aesthetic grade, which you can download and use to place your bids.

For each grade, we have included a reference that identifies its potential in the market. This can help you understand if the product aligns with your market needs.

GRADING OUR OPTIONS

GSM Go Auction Graded Device

Light marks from use and minimal aesthetic imperfections

GSM Go Auction Graded Device

Grade D devices show considerable cosmetic damage and may have screen lifting with LCD white spots/shadow.

Faulty products have the same aesthetic characteristics but may have one or more non-functioning features.

Grade D devices may have screen chips or cracks, along with significant cosmetic housing damage.

Phones have physical issues like white dots, heavy scratches and dents.

These devices are suitable for component harvesting.

- Multiple instances of damage to the screen or casing, including larger and deeper scratches.
- May feature numerous cracks and damage on the screen and other surfaces.
- May incorporate non-genuine parts.

GSM Go Auction Graded Device

Despite significant cosmetic damage, these devices contain many valuable components for salvage or repair.

Faulty products have the same aesthetic characteristics but may have one or more non-functioning features.

The preferred grade when seeking items for salvage or repair.

The device may show over three missing pixels, burn-in images in the center, lines issues, touch failure, dark/white spots, backlight problems, rear camera malfunction, fingerprint/Face ID failure, SIM/SD card detection issues, PC connection problems, and Wi-Fi/Bluetooth/GPS malfunctions.

- Ideal for salvaging or using for parts.
- Not suitable for functional testing.
- May have activation or network locks.
